

Master's Degree in Educational Technology Program Plan

College of Education

A program of studies for the master's degree must be prepared by the advisor and student prior to the completion of 9 semester credits. All requirements (including transfer credit) must be completed within five years from the date of the first course counted toward degree requirements. The final 21 credits must be completed after admission into the MAET Program.

So that you may be certified for graduation promptly upon completion of your program, as a degree candidate, you must obtain final program approval from your advisor during or immediately prior to the semester in which you enroll for the final course of your program plan.

Name:		PID:	A
