Leading Learning:

Increasing Active Engagement and Learning in Educational Organizations

This graduate course focuses on developing leadership skills to promote professional growth, development, and learning in organizations. Students practice and learn strategies to build capacity through relationships, collaboration, and the facilitation of learning through the use of supervision, evaluation, and reflection. Although designed for educators, this course is a prime opportunity for leaders of organizational and professional learning in any field.

Summer Term 2022

June & July

Self-paced, asynchronous course for 3 credits
